

**AMENDMENTS TO THE CLAIMS:**

**Please amend the claims as follows. Please add new claims 9-20.**

1. (Currently Amended) A fuel tank structure, comprising:  
  
a display portion of a working position ~~of~~ for locating a waste fuel hole, the display  
portion being provided at ~~an~~ a lowest outer surface of a tiered-bottom fuel tank in  
correspondence with a fuel remaining portion.
  
2. (Currently Amended) The fuel tank structure according to Claim 1,  
wherein~~[[:]]~~ the display portion is ~~installed in a state that the display portion is placed right~~  
disposed below a chamber module arranged ~~at~~ on the inside of ~~[[a]]~~ the tiered-bottom fuel  
tank and surrounds the chamber module.
  
3. (Currently Amended) The fuel tank structure according to Claim 1,  
wherein~~[[:]]~~ the display ~~position~~ portion is comprises a bead portion formed by projecting a  
predetermined amount of the bead portion to an inner side of the tiered-bottom fuel tank.
  
4. (Currently Amended) The fuel tank structure according to Claim 2,  
wherein~~[[:]]~~ the display ~~position~~ portion is comprises a bead portion formed by projecting a  
predetermined amount of the bead portion to an inner side of the tiered-bottom fuel tank.
  
5. (Currently Amended) The fuel tank structure according to Claim 3,

wherein[[:]] the bead portion includes a plurality of non-continuous bead portions.

6. (Currently Amended) The fuel tank structure according to Claim 4, wherein[[:]] the bead portion includes a plurality of non-continuous bead portions.

7. (Currently Amended) The fuel tank structure according to Claim 3, wherein[[:]] the bead portion includes ~~the~~ a plurality of the bead portions and cut portions formed among the respective bead portions.

8. (Currently Amended) The fuel tank structure according to Claim 4, wherein[[:]] the bead portion includes ~~the~~ a plurality of the bead portions and cut portions formed among the respective bead portions.

9. (New) A fuel tank structure, comprising:  
a display portion of a working position for locating a waste fuel hole, the display portion provided on at least one bottom outer surface of a saddle type fuel tank in correspondence with a fuel remaining portion.

10. (New) The fuel tank structure according to Claim 9, wherein the display portion is disposed below a chamber module arranged on the inside of the saddle type fuel tank and surrounds the chamber module.

11. (New) The fuel tank structure according to Claim 9, wherein the display

portion comprises a bead portion formed by projecting a predetermined amount of the bead portion to an inner side of the saddle type fuel tank.

12. (New) The fuel tank structure according to Claim 10, wherein the display portion comprises a bead portion formed by projecting a predetermined amount of the bead portion to an inner side of the saddle type fuel tank.

13. (New) The fuel tank structure according to Claim 11, wherein the bead portion includes a plurality of non-continuous bead portions.

14. (New) The fuel tank structure according to Claim 12, wherein the bead portion includes a plurality of non-continuous bead portions.

15. (New) The fuel tank structure according to Claim 11, wherein the bead portion includes a plurality of the bead portions and cut portions formed among the respective bead portions.

16. (New) The fuel tank structure according to Claim 12, wherein the bead portion includes a plurality of the bead portions and cut portions formed among the respective bead portions.

17. (New) A fuel tank structure, comprising:  
two display portions of two working positions for locating two waste fuel holes, the

two display portions provided on two bottom outer surfaces of a saddle type fuel tank in correspondence with at least one fuel remaining portion.

18. (New) The fuel tank structure according to Claim 17, wherein at least one of the two display portions is disposed below a chamber module arranged on the inside of the saddle type fuel tank and surrounds the chamber module.

19. (New) The fuel tank structure according to Claim 17, wherein the two display portions each comprise a bead portion formed by projecting a predetermined amount of the bead portion to an inner side of the saddle type fuel tank.

20. (New) The fuel tank structure according to Claim 18, wherein the two display portions each comprise a bead portion formed by projecting a predetermined amount of the bead portion to an inner side of the saddle type fuel tank.
